

PPI-200-SS EV-6

INTERLEAVING MODULE

Only adds 12" to line length

- Fast payback through reduced materials and labor cost
- Minimal training required
- Interfaces to any of our stacker modules
- Cuts paper, film, foil, and multi layer or laminated sheets
- Infinitely adjustable cut lengths

Packaging Progressions, Inc. announces a true evolution in interleaving and underleaving. The PPI-200-EV-6 Interleaving Module only adds 12" to your overall line length and can attach directly to the outfeed of your existing slicer. With the ability to place paper, film, foil, or other media under your sliced products, the EV-6 will allow you to add an interleaved or underleaved offering to your product line without a large investment in production space.

DIMENSIONS.....21.3" L (overall) 12" L (line impact)
x 23.63" W x 42.25" H

OPERATING WIDTH.....6"

CUT LENGTH.....3.5" minimum / 6" maximum

PRODUCT RATES.....Up to 120 portions per minute (product dependent)

LANES.....1

ELECTRICAL.....220 VAC single phase 10 amp

INTERLEAVING MATERIAL

Rollstock.....6" max width, 12" max diameter, 3" core

Paper.....Wet or dry waxed, 1 or 2 ply, silicone, parchment

Film.....High or low density poly

Metalized.....Foil or susceptor

Food Safe.....Reduced microbial paper
