The right technology for the right solutions

We manufacture a full line of pre-packaging and processing equipment for the food industry. The solutions we provide increase productivity and reduce costs - improving your bottom line!

Designed to interface with virtually any equipment, our interleavers accurately and consistently place a pre-programmed sheet of paper or film under a sliced or formed portion. Once the interleaver sheet has been placed under the portion, it may be folded or wrapped around the product for ease of separation and sanitary handling.

Stacking modules may be added to the interleaver to automatically count and stack the interleaved portions into groups. Stacked groups are then conveyed to your wrapping or cartoning machines, or can be easily packed-off by hand.

We also offer a full line of conveying options to move your product to and from our equipment. Our complete solutions include unparalleled service and hands-on training.

I N T E R L E A V E R S

Operating width up to 40" wide
(round, square, oval or rectangular)

Speeds up to 325 portions / minute single lane
(more for multiple lane applications)

Paper cut length 3.50-26.00"
Paper roll width 3.5-40.00"
Paper roll diameter 18"

Paper can be folded over product in any direction

Modular design permits use with a variety of stackers

Accepts wax and silicone papers as well as poly film
and foil (we can test-run any paper, film or foil)

C O N V E Y I N G S Y S T E M S

Jump Conveyors
Shuttle Conveyors
Portion Conveyors
Merging Conveyors

H I G H S P E E D C O U N T E R S T A C K E R S

We offer a complete line of stacker modules that can be used in conjunction with our interleavers or with other processing equipment.

STARWHEEL STACKER

Portion sizes up to 26" long x 20" wide
Speeds up to 150 portions / minute single lane

FERRIS WHEEL STACKER

Portion sizes up to 9" long x 40" wide
Speeds up to 325 portions / minute single lane

PLATFORM STACKER

Portions are gently stacked to your pre-determined height before final packaging. Portions per minute will depend on product characteristics.

PATTY STACKER

Flexible design permits stacking of any size patty or patty matrix
