

Reduce Costs and Add Value with High Speed Underleavers and Auto Stackers

Improve separation of your sliced salmon.

your seafood product or fully wrap it top and bottom to ensure freshness and quality. Interleaving salmon and other fish improves peel-ability and sanitary handling. We also interleave layout salmon slices on paper for food service, to display in a cooler, or to be used for sushi.

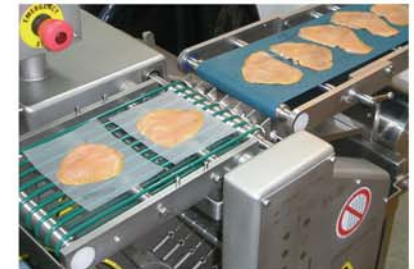

Our Underleavers place a separator between pieces of

Versatile for many different applications.

your product and stack them into a finished portion for final packaging. Stacks can be straight or shingled depending on your package.

Our automatic Counter Stackers count pieces of

Universal and modular designs allow our systems to be integrated with virtually any upstream processing equipment (including slicers, formers, and breaders) or downstream packaging machines.
